

CITY OF EAST GRAND RAPIDS

750 LAKESIDE DRIVE SE-EAST GRAND RAPIDS, MICHIGAN 49506

NOTICE

Please Keep for Future Reference

June 2025

Dear East Grand Rapids Resident/Property Owner:

Mill and overlay project work for the following locations will be completed in early July:

- Eastwood Ave (Lake Dr to Hall St)
- San Jose Dr (Floral Ave to Hall St)

The scope of the mill and overlay work will be to mill (remove) the top wearing course of asphalt and repaving that course. This is not a full depth mill/overlay, but replacement of the wearing course that impacted by the lead service line replacements. During milling (removal) and paving the street surface there will be limited full closures for your street.

Pink door hanger notices will be provided before this occurs, typically one to two days before along with no parking and construction signs to prepare residents for the final phases of the project. Residents should park on adjacent side streets during this limited time at the end of the project to avoid any access issues if home during the day. During other times the contractor will work with residents in the impacted area to allow for local ingress/egress traffic and maintain access to driveways. Motorists who are not going to or leaving a destination within the construction area are prohibited and must utilize alternative routes. **Please keep in mind that if it rains or if there is an equipment issue, scheduled work will likely be shifted a few days, so please be prepared for this if one of these things occurs. Your patience is appreciated.**

No parking, project paving signs, and door hanger notices-below

Process:

- The milling process will take one day. After milling out the road surface, a streetsweeper will follow.

- Paving typically follows milling out the road surface within a few days. A truck will apply tack, which is a bonding agent for the asphalt. Trucks carrying asphalt and pavers will be on site and complete work in one day. The road will be open to traffic once asphalt testing has been completed, and the temperature has cooled. You will know when the road is open because barricades will be removed.

Tack truck, paver, and roller equipment in that order will be part of the paving process-below

- Do you need more information? Please contact the Department of Public Works-Engineering team at 616-940-4817. Project updates citywide can be monitored via the city website from the home page by clicking the “Construction Updates” icon at the bottom of the page or by scanning the QR code provided below or on project information stations posted in project areas. Copies of notices are also provided at information stations if residents need additional copies.
