

Neighborhood Road Pavement FAQs

Your Street Will Be **Surface Sealed**

WHAT YOU NEED TO KNOW

1. You will have access to your driveway and street at all times.
2. To avoid being towed, cars must be removed from the street between the hours of 7:30 a.m. and 5 p.m. Arrival time of the crew will vary between these hours as they are working on several streets throughout your community.
3. The pavement **must be dry** so please do not use lawn sprinklers, wash cars, etc. the day before and on the day of treatment.
4. Please observe all signs and flagger directions including driving no faster than **5 MPH**, from the time the road is treated until the sand cover has been removed (within 2 days).
5. Garbage and recycling pick up, scheduled lawn maintenance, etc. will go on as scheduled.
6. For special events, moving, garage sales, furniture/appliance deliveries, etc., call 1-800-333-6309 for assistance.
7. Drive no faster than **5 MPH**, from the time the road is treated until the sand cover has been removed (within 2 days).
8. If maintenance seal is tracked on driveways, it will naturally weather off.
9. Rain will delay work until the following day. If work has been delayed for more than a few days, you will be re-notified prior to work being performed.
10. The all-natural American-sourced maintenance seal is safe for children and pets, but to avoid tracking into your home, please keep them off of the treated areas for a few days.
11. The all-natural American-sourced maintenance seal is not harmful to vehicles and can be removed safely with vehicle soap and water.

Your Street Will Be **Surface Sealed**

WHY IS THIS PROCESS NECESSARY?

Pavement Technology, Inc. has been safely applying an American-sourced, field-proven Maltene Replacement Technology (MRT) product in neighborhoods like yours since 1972. Your local community's road department has asked us to apply this pavement rejuvenator to seal and extend the life of your roads in order to reduce the long-term costs and disruptions of road maintenance.

You will have access to your street and driveway at all times. Please adhere to a **5 MPH** speed, from the time the road is treated until the sand cover has been removed (within 2 days).

This Preventive Maintenance process is an economical use of your tax dollars that will extend the life of your roadways. Please be assured we will be in and out of your neighborhood with as little disruption as possible. We look forward to working in your community.

We appreciate your cooperation. View our website or contact us via email at info@pavetechinc.com.
