

Preserving the Road Home

ATTENTION PLEASE

Dear Resident;

Weather permitting; between Tuesday and Friday (7/22-7/25) next week, your street will have road construction taking place. A chip seal interlayer is being placed on your street. This work will take 1-2 hours per street, and you are immediately able to drive on the street after application.

Please observe the “No Parking” signs that will be posted on your street the day prior to work occurring. Please park in your driveway when these signs are posted. Access to and from your home will be unaffected.

Your street rehabilitation is a two-part process. The second phase will occur 1-2 weeks after the first phase occurs next week. A microsurfacing (modified asphalt) application will be placed as the final part of construction. A second notification for that process will be passed out before construction as well as “No Parking” signs being reinstalled.

From our experience, we know that our success depends upon your cooperation and understanding, so please observe the following:

1. Keep the street free of all parked cars between 7AM and 8PM.
2. Please turn off all water sprinklers.
3. If your street is scheduled to be worked on and it rains, we will return the next day if it's not raining to complete the work.

Thank you for your patience and understanding and please don't park on the street!
